

Ailan Alberto Ñañez

Full-Stack Developer | Laravel · Vue.js · React · Node.js

Caracas, Venezuela | +58 424-1306799 | ailanruiz1994@gmail.com | LinkedIn: Ailan Alberto Ñañez

PROFESSIONAL PROFILE

Full-Stack Developer with 8 years of experience building scalable, high-performance web applications. Specialized in the Laravel/PHP ecosystem for backend and Vue.js/React for frontend, with solid expertise in robust architectures, RESTful APIs, database optimization, and technical team leadership. Committed to code quality through SOLID principles, Clean Code, and rigorous technical documentation. Proven experience in critical infrastructure projects, e-commerce, and enterprise management systems — working under Agile methodologies in remote and hybrid environments.

EDUCATION & TRAINING

Full-Stack Development — PHP, Laravel, Vue.js, React 2016 – Present

Self-directed Learning | Udemy / Platzi / Official Documentation

Ongoing training in modern web development, software architectures, and programming best practices.

Cloud Hosting & DevOps — Google Cloud, cPanel, Hostinger 2020 – Present

Self-directed Learning | Google Cloud Skills Boost / Community

Hosting environment administration, server configuration, and production web application deployment.

TECHNICAL SKILLS

Frontend: Vue.js (Quasar, Vuetify), React (MaterialUI), NextJS, HTML5, CSS3/SASS, Bootstrap, JavaScript, TypeScript, jQuery

Backend: PHP / Laravel, Ruby on Rails, Node.js, TypeScript

Databases: MySQL, relational design, SQL query optimization

APIs & Integrations: RESTful APIs (design, consumption & documentation), payment gateways, external services

Infrastructure: Google Cloud, Hostinger, cPanel, Git, GitHub, GitLab

Practices: SOLID, Clean Code, Scrum, Kanban, CI/CD, Code Review, Technical Documentation

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer — *Independent / Private Clients* Jun. 2018 – Present

- Full-stack web application development for private clients and businesses, using Laravel, Vue.js (Quasar, Vuetify), and React as core technologies.
- Architecture design and implementation for management systems, e-commerce platforms, and educational applications — focusing on scalability and long-term maintainability.
- Performance optimization and UX improvements across medium and high-complexity projects.
- End-to-end project ownership: requirements gathering, development, deployment, and post-delivery support.
- Integration of external APIs, payment gateways, and third-party services into web applications.

Web Developer — *Prolesys Consultores C.A.* Jun. 2022 – Apr. 2025

- Developed critical systems for national infrastructure, adhering to strict security requirements and high-availability standards.
- Provided technical leadership in implementing robust architectures and establishing team-wide development standards.
- Optimized performance in high-traffic applications, reducing response times and improving overall system stability.
- Led and mentored the development team on best practices: Clean Code, SOLID principles, code review, and technical documentation.
- Designed and consumed RESTful APIs for integration with external systems and third-party services.

Web Developer — *SISMG Chile*

Jun. 2022 – Apr. 2025

- Developed and maintained software modules for clients in the Chilean market, coordinating with remote teams.
- Built frontend solutions with Vue.js and React, ensuring cross-browser compatibility and performance.
- Integrated with PHP/Laravel and Node.js backends via RESTful endpoints.
- Participated actively in Agile ceremonies (Scrum/Kanban), contributing to continuous delivery sprints.

Web Developer — *GoldTech*

Mar. 2021 – Nov. 2021

- Developed and maintained data management modules for enterprise systems.
- Implemented performance improvements that reduced page load times by 40% through SQL query optimization and caching strategies.
- Built RESTful APIs for integration with external systems and third-party applications.
- Contributed to legacy module refactoring, improving code maintainability and scalability.

Web Developer — *Corporación Homines*

Sep. 2019 – Feb. 2021

- Developed data management modules for internal corporate systems.
- Collaborated in the implementation of a microservices architecture, improving system modularity and scalability.
- Built responsive user interfaces with Vue.js, HTML5, CSS3, and JavaScript.
- Actively participated in legacy system migration to modern technologies, reducing accumulated technical debt.

LANGUAGES

Spanish: Native.

English: Basic — technical documentation reading.
